About Us

Ureval Arquitectos + Ingenieros is an architecture, engineering, and consulting firm specializing in highly complex projects across the healthcare, hospitality, real estate development, and corporate sectors, integrating design, strategy, and management to create spaces that generate sustainable value.

We create value through project design and development. We create and configure flexible, functional spaces that open the door to infinite possibilities, leave a lasting mark, and make a positive impact on society.

We create value through project design and development. We are driven by a passion for building flexible, functional spaces that open the door to infinite possibilities, leave a lasting mark, and make a positive impact on society.d.

To design and develop projects that provide exceptional experiences within an optimal and efficient work environment.

Vision

To be recognized internationally as leaders in innovation and sustainability in the design and development of projects, driving transformation in the industry

**We create innovative projects
that impact and transform.**

- Customized Design
- Standardized and Efficient Construction
- Strategic Thinking Focused on the Business Model
- Multidisciplinary Collaborative Work
- 100% BIM Methodologies and Technologies
- Comprehensive Sustainability

**These are some of the ways in which, at Ureval
Architects + Engineers, we make a difference in
each of our projects**

**LUXURY LIFESTYLE
AWARDS 2022** *14th Annual*

Hotel Tropical Pto Plata | RD

Consulting

We support our clients through all stages of project development.

Preliminary Studies:

- Feasibility Analysis
- Investment Economic Analysis

Design

- We design architectural solutions for buildings that are adaptable to users' needs.
- Master Plan Design
- Architectural Design
- Master Plan Design
- Design and coordination of engineering systems and construction documents

Supervision and Project Contruccion

We manage projects comprehensively and handle strategic partnerships.

Construction

- Project Management
- Supervision

Key differentiators

01 Technology

Implementation of different technologies to optimize the design and construction of projects.

02 Standards

Compliance with international regulations, ensuring project standardization, safety, and quality.

03 Complexity

Experience in highly complex projects, from planning to construction.

04 Sustainability

Focus on energy efficiency, use of environmentally friendly materials, and waste management systems.

Arquitectos + ingenieros

Our values

Innovation

We design and build creative, cutting-edge solutions that make a difference in every project.

Sustainability

We design with ecological awareness, optimizing resources and minimizing environmental impact.

Excellence

We strive for the highest quality in every detail, from design to execution.

Commitment

We are 100% involved in every project, serving our clients and communities.

Integrity

We act with ethics, transparency, and responsibility in each of our decisions.

Why Ureval?

- 01** Team specializing in the planning, design, and management of highly complex projects.
- 02** Specialized multidisciplinary teams.
- 03** Use of Building Information Modeling (BIM) methodologies and technologies.
- 04** Application of Lean Construction methodologies to streamline processes.
- 05** Experience with highly complex projects across various sectors..
